

The future of ballistic protection is here...

B3B

+ Lighter
+ Stronger

AGP's most evolved Bullet Resistant Glass now with cutting-edge technology and advanced materials that creates a product with superior ballistic performance and a world-class look.

www.agpglass.com

For more than 50 years AGP has been leading the production of Bullet Resistant Glass by developing cutting edge technologies, advanced materials and extense innovation in Transparent Armor Solutions. All of this expertise has been included in B33, the most advanced BRG with exclusive technology.

B33 is a dual technology that incorporates special polymers and thermal treatments to the glass, generating the best BRG solution by optimizing the weight-thickness relation, ballistic performance and increasing the durability of the product.

NORM: NIJ IIIA / CEN B4

22
mm

.357 Magnum JSP
.44 Magnum SWF
9mm FMJ
.44 Magnum JSP*

*MULTI-HIT
Magnum .44
Triangle of 50mm side

Additional protection:

4 shots of AK-47.
Ammo: 7.62 x 39mm Lead Core.
Shoot pattern: 400 mm side.

_____ or _____

1 shot of AR15
Ammo: 5.56 x 45mm M193.

UDRI Ballistic certifications available
