

WITH AGP'S STEEL OFFSET YOUR INCREASED SECURITY IS A GUARANTEE

THE AGP STEEL OFFSET INCREASES THE PERFORMANCE OF THE BRG  
MAINTAINING THE ORIGINALITY OF THE VEHICLE

Improve the bullet resistant glass durability, therefore the steel protects the glass offset against rupture during its use.

The Steel Plus R in BR6 bullet resistant glass do not offer ballistic protection against ammunition BR6 (7.62x51mm), therefore is necessary to add up the steel offset.

THE STEEL UTILIZED BY AGP IS OF THE HIGHEST GRADE AND THE SOLUTION IS BALLISTICALLY CERTIFIED BY INDEPENDENT LABORATORIES.

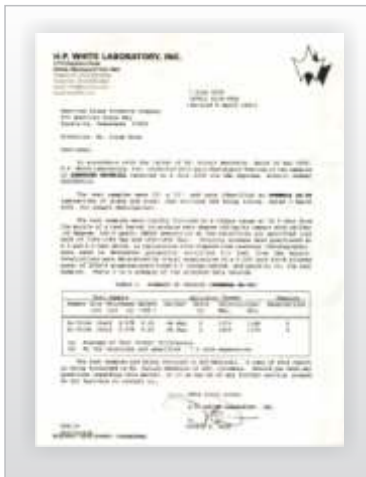

STEEL OFFSET

✓ Minimum modifications required to the frames and doors.

✓ Cost effective during installation

Certification HP White No HPWLI 8280-11A

- Efficiency in the armoring process ( modification reduction, faster delivery).
- Exclusive steel cast, certified by external laboratories.
- Original shape and Integrity are kept.
- Major glass resistance during manipulation. It avoids exterior glass breaks.
- Benefit-cost positive relationship.
- Better stability and resistance in extreme conditions.
