

Transparent Armour Systems for Land Platforms

Technical Information:

Thickness: 75 - 110 mm

Weight: 160 - 215 kg/m²

Ballistic standard: LEVEL 3 STANAG KE & FSP qualified at high and low temperatures

Features:

Dura P: Protective polymer that enhance the resistance of the spall-shield from chemical reactions.

High Performance: Transparent armour that incorporates the latest technologies to preserve ballistic protection when exposed to high and low temperatures.

Edge Plus: Powerful edge protection layer that guards the glass against external agents that may compromise its durability.

Bullet-resistant glass integrated to military grade frames: Incorporation of frames to facilitate the mounting and dismounting of the glass and the assembly in the vehicle.

Our glasses may also incorporate:

Heating systems: Heating elements, temperature sensors and temperature controllers.

Dura G: Ultra-thin glass cover for enhanced resistance against scratches in the inner side of the Bullet-Resistant Glass.

Gun Ports: Fully functional gun ports integrated to the Bullet-Resistant Glass.

Thanks for visiting our booth!

We are looking forward to working with you and offer the best solution designed to your requirements
